WORK EXPERIENCE & PROJECTS

Web Development (Angular) Intern — C360 Software

- Developed Angular-based master screens for Category and Vendor management in the (SCOP-RFID) platform. Integrated REST APIs to manage CRUD operations. Implemented real-time RFID detection display by communicating with a local RFID middleware service enabling dynamic updates on UI when RFID tags are scanned.

DIGITAL RESTUARANT

- The **Digital Restaurant** is a responsive and interactive website built using **HTML, CSS, and JavaScript**, designed to showcase a restaurant's menu, special offers, and services. It features an attractive layout with smooth animations, an online table reservation form, and easy navigation. The site is optimized for all devices, ensuring customers can browse the menu, learn about the restaurant, and make bookings seamlessly.

JOB APPLICATION DETECTION

- The **Job Application Detection** project is a web-based system that uses **machine learning, NLP, and rule-based checks** to identify fake job applications. It features a **Vite + Tailwind CSS frontend** with **MongoDB** for secure data handling. By analyzing resumes, validating credentials, and detecting anomalies, it provides real-time fraud scores and reports to help HR teams streamline recruitment and prevent scams
